"Nothing is impossible."

## SUMMARY

I am a second-year master's student majoring in Artificial Intelligence, with a strong focus on **federated learning** and its applications in **healthcare**. My research aims to develop robust, efficient, scalable, and privacy-preserving AI solutions for real-world healthcare applications. My previous work has primarily focused on **asynchronous federated learning**, **multi-modal** and **privacy-preserving** methods in the medical field. I am looking for a Ph.D position in **25 fall**.

## EDUCATION

### Institute of Computing Technology, Chinese Academy of Sciences
Beijing, China

Master of Engineering, Computer Science
2022.09 - Exp. 2025.06

- **Research Topic:** Asynchronous Federated Learning, Medical Application in FL.
- **Advisor:** Prof. Yiqiang Chen and Prof. Xinlong Jiang
- **GPA:** 3.79/4
- **Main Courses:** Algorithm Design and Analysis (96), Deep Learning (92), Pattern Recognition and Machine Learning (92), Intelligent Computing System (97), Practial Optimization Algorithm and Application (94), etc.

### School of Computer Science and Technology, Hainan University (211)
Hainan, China

Bachelor of Engineering, Software Engineering for Big data (Big data courses are taught in English)
2018.09 - 2022.06

- **GPA:** 3.68/4 (89.65/100), **Ranking:** 10/181
- **Main Courses:** Linear Algebra (97), Data Structure (99), Advanced Mathematics (90), C++ Programming (96), etc.
- Outstanding Graduate Awards (3%), The First Prize Scholarship (3%) and Merit Student Awards.

## SELECTED PUBLICATIONS

Note: Please check out Google Scholar for my full publication list. The total # citations exceeds 250, with an h-index of 4.

- **KAMOFL: K-Asynchronous Multi-objective Federated Learning with Privacy, Efficiency, and Utility Trade-offs.**
  <u>B. Yan</u>, Y. Chen, Q. Chen, X. Jiang, Y. Kang, and T. Zhang. (2024). . Under review.
- **Model Trip: Enhancing Privacy and Fairness in Model Fusion across Multi-Federations for Trustworthy Global Healthcare.**
  Q. Chen, Y. Chen, <u>B. Yan</u>, X. Jiang, X. Zhang, Y. Kang, et al. (2024). **The 40th IEEE International Conference on Data Engineering (ICDE'24, CCF-A).** Accepted.
- **FedEYE: A Scalable and Flexible End-to-end Federated Learning Platform for Ophthalmology.**

## EXPERIENCES

### Federated Collaborative Platform and System for Digital Ophthalmology
Beijing, China

Research Subject with Aier EYE Hospital (Long-term cooperation)
2021.12 - 2024.06

- **Asynchronous FL.** I propose an asynchronous federated aggregation method, AFL-CS, which takes into account both local gradient direction and global gradient direction. It can achieve faster and more stable convergence, and make the platform more robust to highly heterogeneous environments (network delay, computer power, offline, etc.).
- **Multi-objective Trade-offs.** I propose a theoretical-guided method KAMOFL, bridging theoretical and experimental solutions to obtain better Pareto frontier and achieve better trade-off between privacy, efficiency, and utility in KAFL .
- **Multi-modal FL.** Explore FedAI solutions for ophthalmology (fundus image, OCT image, medical report, etc.) to build a large-scale multi-modal model in modal heterogeneous scenarios via representation learning and modal alignment.
- **FedEYE Platform.** We design a scalable and flexible federated learning platform for ophthalmologist, and provide a user-friendly web interface for quickly launching the federated tasks. The platform is deployed in Aier EYE Hospital and open now. It already has 50+ hospitals or institutes and launched 800+ federated tasks.

**SmartMedical: Federated Medical Image Analysis System**                    <span style="color:red">Hainan, China</span>
Undergraduate Student Innovation and Entrepreneurship Practice Project (Host)    <span style="color:red">2021.06 - 2022.06</span>

- We develop a medical image recognition software using federated learning without sharing raw patient data.
- We ensemble four models, including VGG, MobileNet, ResNet, and COVID-Net, to enhance system generalization.
- We utilize GradCAM++ to visualize convolutional layers for annotating lesion sites with diagnosis probability for doctor reference. Additionally, we propose a contribution evaluation algorithm, FedCM, for multi-party contribution measurement. [Demo]

## OPEN SOURCE CONTRIBUTIONS

**FedML-AI Community (Research Intern & Contributor) ⌗ (★4k+)**          <span style="color:red">2022.06 - 2022.09</span>

- I enhance **FedCV** with the popular object detection model (e.g. YOLOv5, YOLOv7, YOLOv8, etc.), deploy them to produce environment and provide technical support for the community.
- I completely port the **FLamby** benchmark (contains 7 real-world federated datasets) to **FedML Open Platform**.

**hCaptcha-challenger (Maintainer) ⌗ (★1.3k+)**                          <span style="color:red">2021.12 - 2023.10</span>

- We develop a robust AI-powered captcha solver utilizing Python and Selenium, effectively bypassing hCaptcha with an **accuracy exceeding 90%**, and provide a user-friendly API for developers.
- I utilize the CLIP model to achieve zero-shot captcha image classification and automatically labeling the captcha images via clustering. With the semenatic alignment ability of CLIP, the solver can achieve an open-set recognition.
- I release the **hcaptcha-model-factory (★66)** with a comprehensive workflow for community.

**Awesome-FL (Maintainer) ⌗ (★1.2k+)**                                   <span style="color:red">2023.06 - present</span>

- I actively contribute to the content, maintaine the repository, and keep up with the latest research in FL.

**AI-Paper-Collector (Maintainer) ⌗ (★1.1k+)**                           <span style="color:red">2021.12 - 2022.12</span>

- We develop an automated paper collector from top AI conferences (NeurIPS, ICML, etc.) with web interface.

**Personal Projects ⌗**                         ⌗ **beiyuouo** <span style="color:red">(150+ followers, 500+ stars)</span>

- **arxiv-daily (★77):** Automatically collect and push the latest arXiv papers to GitHub using GitHub Actions.
- **awesome-asynchronous-federated-learning (★70):** A collection of papers about asynchronous federated learning.
- **mid-air-draw (★17):** A simple hand-drawn and gesture recognition system using YOLOv5. [Demo]

## SELECTED AWARDS

| | | |
|---|---|---|
| 2017 | **Silver,** (Intl.) Asia-Pacific Informatics Olympiad, APIO | <span style="color:red">Beijing</span> |
| 2019 | **First Prize,** (Natl.) The 3rd Silk Road Robotics Innovations Competiton | <span style="color:red">Xi'an</span> |
| 2020 | **Second Prize,** (Natl.) Contemporary Undergraduate Mathematical Contest in Modeling (CUMCM) | <span style="color:red">Beijing</span> |
| 2020 | **Second Prize,** (Natl.) China Collegiate Computing Contest - Group Programming Ladder Tournament | <span style="color:red">China</span> |
| 2020 | **Second Prize,** (Natl.) Chinese Collegiate Computing Competition | <span style="color:red">Beijing</span> |
| 2023 | **Sliver & Bronze,** (Natl.) The China Internation College Students' "Internet+" Innovation and Entrepreneurship Competition | <span style="color:red">Beijing</span> |
| 2020 | **Third Prize,** (Natl.) China Collegiate Computing Contest - Artificial Intelligence Innovation Contest | <span style="color:red">Hangzhou</span> |
| 2016 | **First Prize,** (Prov.) National Olympiad in Informatics in Provinces, NOIP | <span style="color:red">Shandong</span> |
| 2020 | **First Prize,** (Prov.) China Collegiate Computing Contest - Group Programming Ladder Tournament | <span style="color:red">Hainan</span> |
| 2020 | **Gold & Sliver,** (Prov.) The 6th "Internet+" Innovation and Entrepreneurship Competition in Hainan | <span style="color:red">Hainan</span> |
| 2021 | **First Prize,** (Prov.) Chinese Undergraduate Electronic Design Contest in Hainan | <span style="color:red">Hainan</span> |
| 2020 | **Second Prize,** (Prov.) China Collegiate Computing Contest - Artificial Intelligence Innovation Contest | <span style="color:red">South China</span> |

## SERVICES

**IEEE Hainan University Branch**                                         <span style="color:red">Hainan, China</span>
President, Student Membership                                             <span style="color:red">2021.03 - 2022.06</span>

**Association of Robotics and Artificial Intelligence, Hainan University**    <span style="color:red">Hainan, China</span>
Vice President, Co-Founder                                                <span style="color:red">2020.07 - 2022.06</span>

## SKILLS & INTERESTS

| | |
|---|---|
| **Language** | Chinese(Native), English(Fluent, CET-4: 539, CET-6: 478, IELTS: preparing!!) |
| **Programming** | Python (PyTorch, Tensorflow), C/C++, Java, JavaScript, HTML, etc. |
| **AI/ML** | Federated AI (FedML, PySyft), Data Analysis (Jupyter, pandas, scikit-learn) |
| **Software Engineering** | Git, Docker, Kubernetes, MPI4py, CI/CD, Hadoop, Spark, etc. |
| **Photography** | Enjoy the life and capture the moments ;) |
